Chapter 1: The Viral Window

Years taken to reach 100 million users. AI shattered the record of every previous major tech.

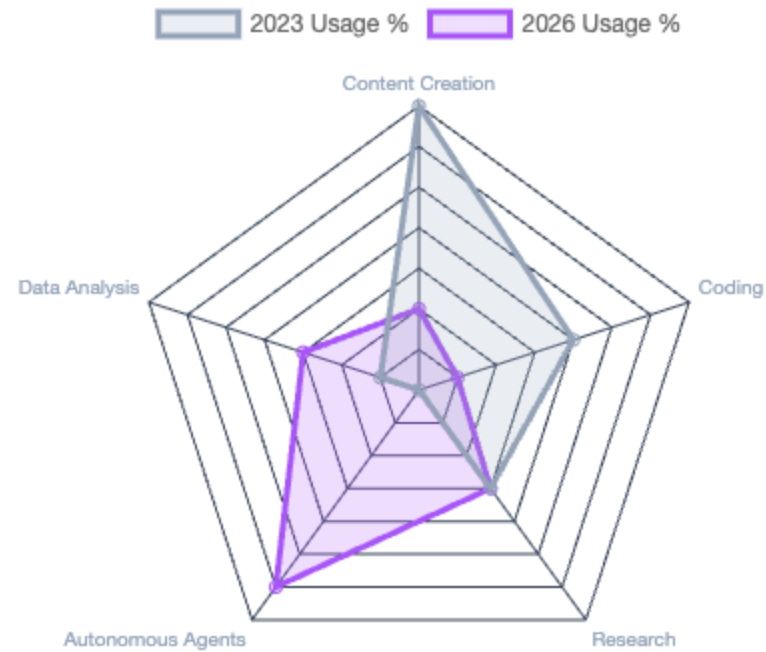

The Insight

"By 2026, the question shifted from 'How do I use AI?' to 'How do I manage my AI agents?'"

The adoption curve isn't just a line; it's a structural shift in how humans interact with silicon.

Chapter 2: The Functional Migration

Shift: Creative → Operational

In 2023, AI was a novelty for **Content Creation**. Fast forward to 2026, and the primary growth sector is **Autonomous Agents**—systems that don't just write emails, but execute entire supply chain updates and complex data modeling without constant oversight.
